

BEECH HOUSE

NHS OFFICES, WATERSIDE SOUTH, LINCOLN

United Lincolnshire Hospitals NHS trust required new office premises in Lincoln for their district nursing division. Beech house, a large 3 floor 24420 sq ft office building was chosen, located near to the river Witham in Lincoln Centre.

Brook and Mayo were tasked with designing and installing all the electrical and communication needs for the new offices across the entire building space. Utilizing a full range of LED lighting, multi-compartment dado trunking and stylish accessories Brook and Mayo completed this design and build project to programme.

A new distribution system was required for the building, and Brook and Mayo designed and delivered, a modernized system suitable for future expansion and role change.

The internal and external LED lighting was designed in house, by our own project engineers and all the electrical service systems were designed by ourselves in keeping with NHS needs.

The NHS I.T requirements were extensive, including the use of fiber optic cabling and CAT6 network cabling. These were installed within our contract and provided in a smart user friendly way for the office environment with multiple hot desk and laptop users.

PROJECT VALUE
£240,000

PROJECT DURATION
12 WEEKS
